

## Fun with Type Assignment

Refer to the Type in Photoshop Student Guide handout to complete the tasks in this assignment.

In this assignment you are to create **6 different Word Banners** that use different fonts and different Photoshop Techniques.

Open Photoshop and create a new document that is 500 x 300 pixels. Type a word (your choice). Apply the font settings of your choice. Be sure to apply some kerning and/or tracking to your words.

Apply a text warp to each word – a different warp technique to each word.

To each word, apply one of Layer Style effects listed below. Apply a different effect to different words.

- Bevel emboss
- Gradient fill
- Pattern fill
- Another style of your choice.
- Place an image inside one word using the Layer Clipping Mask technique. (DO NOT use the same blue sky image that we used in class).
- Use the Layer Clipping Mask technique OR the Type Mask tool to make a word appear as if it is carved out of some material such as stone. (DO NOT use the same wood image that we used in class). You will need to use inner shadow and outer glow layer styles for this effect.

Optimize at the best file format and settings for the type of word you create and save in the images folder that is inside the words\_webpage folder. Add the word images to the web page. Zip compress the words\_webpage folder and upload to Blackboard OR your own host server.
